

Scrum Update

Alpha Curr

08 August 2018

1 Daily Scrum

A scrum meeting

- starts on time even if some development team members are missing
- venue change according to what day it is and what we need to do
- time limit depends on when we are having the meeting since it is not daily

Date: 08 August 2018

Scrum Master: Thandi Tshabalala

Project Owners: Dr. Richard Klein, Dr. Matthew Woolway

Project Team: Lehlohonolo Motsi, Tlotlang Sekgetho, Masingita Rikhotso

1.1 Scrum meeting days

Since we have other courses that we are doing as a team we have decided to have Scrum meetings twice a week, that is, on Wednesday 11:00a.m to 12:15p.m and Friday 10:00a.m to 12:00a.m. The reason our scrum meetings are long is because we do not meet everyday so we use the time that we do meet to get a full update from each other over the past few days.

1.2 Choice of programming languages

Language we are going to use

- PHP
- HTML
- CSS
- MySQL (SQL)

Frameworks we can integrate with,

- Vaadin
- GWT
- Bootstrap

The first two frameworks are JAVA based and Bootstrap uses optional JavaScript extensions.
