

Scrum Update

Alpha Curr

15 October 2018

1 Daily Scrum

A scrum meeting

- starts on time even if some development team members are missing
- venue change according to what day it is and what we need to do
- time limit depends on when we are having the meeting since it is not daily

Date: 15 October 2018

Scrum Master: Thandi Tshabalala

Project Owners: Dr. Richard Klein, Dr. Matthew Woolway

Project Team: Lehlohonolo Motsi, Tlotlang Sekgetho, Masingita Rikhotso, Muhammad Varaiwa

1.1 Major Tasks

1. PIMD Venue Booking View
2. Create School Provisional Venue Allocation

1.2 Major Issues

One of the major issues we have come across was that we were using the Lamp server for the project and the Mathematical Science Lab management closed the server since we were not really authorized to use it. This caused a bit of a set back to our plan because we had to prepare our venue server which was given to use by Shan in order for use to continue working.

1.3 Finished Sprint

Sprint 1 has been closed and all user stories with their respective tasks. Sprint 2 is close to being closed, only a few tests need to be completed and validated.

1.4 Tasks On Process

1. Delete Venue Bookings
2. Academic/Administrator Staff Venue Booking Update
3. View Venue Allocations
